

Redis Eats Order Status FAQ

Overview

This document answers the most common questions customers have about order status, tracking, and what to do when something seems wrong with their order.

What Do the Order Statuses Mean?

Status	What It Means
Order Placed	Your order has been submitted. Redis Eats is waiting for the restaurant to confirm.
Order Confirmed	The restaurant has accepted your order and is preparing it.
Being Prepared	The restaurant is actively preparing your food.
Driver Assigned	A Redis Eats driver has been matched to your order and is heading to the restaurant.
Driver at Restaurant	Your driver has arrived at the restaurant and is waiting for your food.
Order Picked Up	Your driver has collected your food and is heading to you.
Arriving Soon	Your driver is nearby. Estimated arrival is less than 5 minutes.
Delivered	Your order has been marked as delivered.

How Do I Track My Order?

Once a driver has been assigned to your order, you can track their real-time location in the Redis Eats app:

1. Open the app.
2. Go to Active Orders or tap the banner at the top of the home screen.
3. A live map will show your driver's current location and estimated arrival time.

Tracking is available from the moment a driver is assigned until the order is marked delivered.

My Order Is Stuck on "Order Placed" — What Should I Do?

If your order has been in the "Order Placed" state for more than 10 minutes, the restaurant may be slow to confirm. Redis Eats automatically follows up with the restaurant after this time.

If you are concerned:

1. Go to your active order in the app.

2. Tap Get Help.
3. Select Order not confirmed.

Support will investigate and keep you updated.

My Order Was Marked Delivered but I Did Not Receive It

If your order shows as delivered but you do not have it:

1. Check around your delivery location (door, lobby, etc.).
2. Check if a neighbor may have accidentally received it.
3. If still not found, open the app, go to Order History, and select the order.
4. Tap Report a Problem and choose Order says delivered but I didn't receive it.

Redis Eats will investigate using driver GPS data and delivery photos. If the delivery cannot be confirmed, you may be eligible for a full refund. See the Refund Policy for details.

Can I Change My Delivery Address After Placing an Order?

Address changes after order placement are limited. If the order is still in Order Placed status:

1. Contact Redis Eats Support immediately through the app.
2. An agent may be able to update the address if the driver has not yet been assigned.

Once a driver has been assigned, the delivery address cannot be changed.

Can I Add Items to My Order After It Has Been Placed?

No. Once an order is submitted, items cannot be added. You would need to place a separate order. If your first order is still being prepared, the two deliveries may arrive close together.

Why Did My Estimated Delivery Time Change?

Estimated delivery times may change due to:

- The restaurant taking longer to prepare your food than originally estimated.
- Driver reassignment (if the original driver had an issue).
- Traffic or road conditions changing.

The app will notify you when your estimated delivery time changes significantly.

My Order Was Canceled — What Happens Now?

If your order was canceled (by you, the restaurant, or Redis Eats), you will receive a notification with the reason. Depending on the cancellation type:

- If canceled before preparation: full refund.
- If canceled during preparation: partial refund may apply.
- If canceled due to no driver availability: full refund.

See the Cancellation Policy for full details.

Contact Support

For order status questions not covered here, contact Redis Eats Support through the app or at support@rediseats.example.com.
